Project: Monitoring of Regional Amazon

Project management: Amazon Cooperation Treaty Organization (OTCA)

IMPACT

Monitoring and Control Component (2)

Governmental actions contribute to the recovery, conservation and sustainable use of the Amazon biome

OUTCOME

Strengthened and enhanced infrastructure, institutional arrangements and tools for the monitoring of deforestation and forest degradation in the member countries of OTCA

OUTPUT

Strengthening of operational capacity of rooms for monitoring deforestation and forest degradation

OUTPUT

Promotion of cooperation between countries in fighting illegal deforestation

OUTPUT

Development of national strategies for monitoring deforestation and forest degradation

IMPACT

Science, Innovation and Economic Instruments Components (4)

Activities of science, technology and innovation contribute to the recovery, conservation and sustainable use of the Amazon biome

OUTCOME

Produced and disseminated knowledge and technologies for monitoring of Regional Amazon

OUTPUT

Structuring and operation of research rooms in member countries of OTCA

OUTPUT

Capability of countries regarding monitoring technologies developed by the National Institute for Space Research (INPE)

OUTPUT

Development of new methodologies and technologies, and production and dissemination of maps for monitoring of deforestation and forest degradation in the region
